

CLEVER MADE SIMPLE

# ABL9 Blood gas analyzer

Patient care based on fast and reliable blood gas results

# Making the complicated simple

Blood gas testing is an important asset for any modern hospital that wants to diagnose and treat critical ill patients. With accurate blood gas analysis you are able to diagnose and treat critically ill patients with confidence.

So, imagine if you as a doctor had direct access to a clever blood gas analyzer. Imagine it being both easy to use and able to deliver fast and

reliable test results on 9 critical parameters using only 70  $\mu\text{L}$  of blood. That's what we imagined at Radiometer, and why we developed the ABL9 blood gas analyzer.

To simplify your daily operations we made the clever simple – and affordable!

## How and why can the ABL9 analyzer help you?

The ABL9 analyzer has a small footprint. Based on proven sensor technology and high analytical performance it is a plug-and-play solution that allows for easy and intuitive testing. Simply by following the on-screen step-by-step user guidance you can run patient samples on the ABL9 analyzer and receive clear information on acid-base balance, oxygen uptake, oxygen transport and electrolyte status.

In no time you have the input you need to make the right diagnostic decisions for your critically ill patients!

## THE TRUTH IS IN THE BLOOD

We've prepared educational videos to support you in understanding the importance of blood gas in the diagnosis and treatment of critically ill patients.

Patient case stories:

- The COPD patient
- The intoxicated boy
- The septic patient

In addition, the following videos show you how to:

- Perform an arterial puncture
- Understand the acid-base balance
- Read the blood gas report using "Tic-Tac-Toe"

**Whatever comes next,  
we make sure life comes first.**

Radiometer products and solutions are used in hospitals, clinics, and laboratories in over 130 countries, providing information on critical parameters in acute care diagnostics. Through connected solutions, expert knowledge, and trusted partnership, we help health care professionals make diagnostic decisions to improve patient care.

# ABL9 blood gas analyzer

Clever made simple

## Touch screen

- Tablet-like touch screen
- Highly intuitive interface
- On-screen step-by-step user guidance

## Inlet

- Self-cleaning function
- Embedded light for easy sample introduction
- Two positions for syringes and capillary tubes

## Sensor cassette

- 9 parameters from 70  $\mu$ L of blood
- Choice of 15 to 600 test cassettes
- Proven thick-film sensor technology

## Performance specs:

- Sample volume: 70  $\mu$ L
- Measuring time: 77 sec, 9 measured parameters and 28 derived parameters

Weight <7kg
